

Assignment 3 Lab 3

I affirm that my work upholds the highest standards of honesty and academic integrity at Wittenberg and that I have neither given nor received unauthorized assistance.

Thomas Weis

Shell Scripts Created:

welcome.sh

```
#!/bin/bash
```

```
echo "Welcome to the computer!"
```

long.sh

```
#!/bin/bash
```

```
date
```

```
ls -l
```

Output, Steps, and Answers:

```
$ head /etc/services
```

```
# Network services, Internet style
```

```
#
```

```
# Note that it is presently the policy of IANA to assign a single well-known
```

```
# port number for both TCP and UDP; hence, officially ports have two entries
```

```
# even if the protocol doesn't support UDP operations.
```

```
#
```

```
# Updated from https://www.iana.org/assignments/service-names-port-numbers/service-names-port-numbers.xhtml .
```

```
#
```

```
# New ports will be added on request if they have been officially assigned
```

```
# by IANA and used in the real-world or are needed by a debian package.
```

```
$ ls /etc
```

Answer to Procedure Step 6 and 9:

By putting this in the background, you could make this available to run whenever you log in to the system.
